Crossword is a word game where the player is given a hint and a number of letters. The player then fills the box grid, finding the right words. Liverpool journalist Arthur Wynne came up with the first crossword puzzle. Arthur Wynne was born on June 22, 1871, in Liverpool, England. He immigrated to the United States at the age of nineteen. He first lived in Pittsburgh, Pennsylvania, and worked for the Pittsburgh Press. An interesting side note was that Wynn also played the violin at the Pittsburgh Symphony Orchestra. Arthur Wynne later moved to Cedar Grove, New Jersey, and joined the New York World newspaper in New York. He wrote the first crossword puzzle for New York World, published on Sunday, December 21, 1913. The editor asked Wynne to invent a new game for The Sunday Entertainment section of the newspaper. Arthur Wynne's first crossword was originally called the crossword and was diamond-shaped. Later the name was crossed, and then as a result of a random typo the hyphen was removed and the name became a crossword. Wynne based his crossword on a similar but much older game played in the ancient Pompeii, which in Latin to English was called Magic Squares. In Magic Squares, the player is given a group of words and must place them on the grid so that the words are read equally across and down. The crossword is very similar, except that instead of giving words the player is given clues. Arthur Wynne added other innovations to the crossword puzzle. While the first puzzle was diamond-shaped, he later invented horizontal and vertical puzzles; and Wynn invented the use of adding empty black squares to the crossword puzzle. The crossword puzzle in the British edition was published in Pearson magazine in February 1922. The first New York Times crossword was published on February 1, 1930. According to the Guinness Book of Records, the first collection of crossword puzzles was published in the U.S. magazine in 1924. The Cross Word Puzzle Book was the first publication of a new partnership formed by Dick Simon and Lincoln Schuster. The book, a collection of crossword puzzles from the New York World newspaper, was an instant success and helped create the publishing giant Simon Schuster, who continue to produce crossword puzzles to this day. In 1997, Crossword Weaver was patented by Variety Games Inc. Crossword Weaver was the first computer program to create crossword puzzles. The hint will always be written in the same part of the speech as the answer. Check out the tips that require answers ending in S, ED, EST or ING. Often these endings can be penciled in (but not always). Checking cross-check these responses can help in verification if the ending is applied. For example, if the key is both across and down multiple for two responses that intersect on the last letter, there is a chance that the letter is 'S'. Foreign words will be marked directly: Friend: O. AMI or indirectly, Friend, in France. The abbreviated responses are listed directly: Whistlestop (Abbr.) - STA or indirectly with an abbreviated word as part of the hint, RR stop - STA. These clumsy conventions are the common norm for American puzzles.
